JPMorgan Chase

RE: Application for openings at JPMorgan Chase

Upon learning about the opening at JPMorgan Chase, I was eager to contact you with my interest. When reviewing the job description, I was excited to see how well my experience aligns with your company's needs and position requirements. From reading your company's website, I feel your core mission and culture suit what I offer as a professional.

As an Full-stack web-developer, I have a well-rounded skill set in Web Development and Database Management along with expertise in System Management, making me an ideal fit for the position. Further, I am a recognized expert in communication and a communicative collaborator. My previous roles have strengthened my capabilities in critical thinking and teamwork, including a keen attention to detail and accuracy.

I am excited at the prospect of bringing my talents to JPMorgan Chase. I look forward to hearing from you, at your earliest convenience, to discuss how my experience and qualifications will prove valuable in your esteemed organization.

My relevant qualifications include my Internship experience at Quantiphi, Nxtgen eSports and my position as Tech Head at Technocracy NITRR. In both these roles, I was building complete Fullstack websites for both organizations with specifications meeting their requirements. Here I refined my Developing and Team working skills along with learning leadership. With these skills and qualifications, I believe I would be a great addition to your organization.

Thank you for your time and consideration.

Sincerely,
Syam Yadavalli.
